Thread: [\[FREE\] | FUD | UPDATES | ZEPHYR DOWNLOADER FREE | Perfect for spreading your RAT!](#)

Shanonnn - October 30, 2016, 3:15 am

[*] What is a Downloader ?[*]

Downloader is a tiny and handy tool that lets you silently download and execute any file(s) on PC, without the person even noticing it!

[*]Why should i use it ?[*]

Is your RAT/Bot stub is too big?

Do you want to keep it light-weight and silent?

Do you want to prevent your main Stub from immediately being analysed by antiviruses?

Just use a downloader! It is a perfect and easy to use tool for spreading!

[*]Current Detections[6.11 2016][*]

Full version is 0/35 , 1/35 , Free now 2/35

[*]Screenshots of Full Version[*]Spoiler [\(Click to View\)](#)

I will be making updates for Zephyr Free only for limited time !

If you like Zephyr free, im more than sure that you will like the full version!?

Also, any feedback is highly appreciated!

Full version coming very very soon!

A few things to note!

Scanning on VirusTotal is strictly forbidden!

This software is for educational purposes only.

Im not responsible for any damage caused by usage of this tool.

Please note that the free version of Zephyr Downloader has only a few of the features from full version and contains a link that points to a rough preview of unfinished product.

[*]Some of the features in full version [*]

- Anti-Offline Failure
 - Output Obfuscation for longer UD time
 - Download any amount of files
 - Support of all extensions
 - Builder allowing full customization of the output
- And many more!

This downloader is useless as shit, as the Name says, its a downloader which Downloads a file from the given Direct-Download-Link. Well the Problem is, its only at scantime UD not at runtime! Any AV will detect it such as Windows Defender, Avast etc.

Yes, because it runs your detected file, he isnt giving out a crypter. The downloader isnt Runtime detected your RAT (or what ever is.)

Basically downloads and executes your main binary(RAT).

Helps to prevent your main binary being scanned by antiviruses in the cloud (wich distribute).....Also somebody might scan your main stub on VirusTotal and it would get detected everywhere else....

Also , if your main stub is not exactly light weight , downloader also helps.

With Zephyr downloader, you dont need a crypter. Output is scantime / runtime FUD. Just customize your output, change your desired settings and ur ready ?

Also, expect full version in max. 2 days. :)

[Scan by Poison Scanner](#)

Pretty awesome for free! I am buying the full one now. I have a feeling people highly underestimate this tool. If you have a private stub this could easily double your fud time cuz your not playing Russian roulette with your server.

3azraiell - November 16, 2016, 1:24 am

its no more FUD cause of the scans :/

Did a little update on the free version

- Very little Re-UD Update (2/35)
- Shortened the stub code
- UI Changes

FREE VERSION SCAN

Remember, full version is already available and constantly getting updated!

No, i think you did not quite get it.

Supports all extensions means that it can download ANY type of file and run it. Not only EXE files.

Extension spoofer might be added to the full version aswell. ?

Stub is still 2/35 UD!!!
Try it out now! ?

Phantom Aboki - November 20, 2016, 6:41 am

@ Cubixx

When building the stub with the Zephyr downloader, it shows built successfully but the built file dosent save in the specified folder and I dont see it anywhere on my PC.

The free version works fine and I see the built file saved.

Not sure why the premium version dosent save after building. Can you assist?

To answer your question mate, Yes I did BUY his product.

On the other hand, due to frauds on here some people want to test (free) product(s) before purchasing so don't interfere when such people do.

Also you have no authority to question me if I press him for anything as he never listed you as support or spokesperson. This is a forum for trading and learning purposes so we can as well press anyone for anything unless/until stated otherwise.

If you did buy his product I take back what I said.

Just bothers me to see people enjoy free products but then pressure the owner into giving them support.

All good, my bad.

Did you even take time to read the thread?
Why would you even go around downloading things not knowing what they are or do? ??

[*] What is a Downloader ?[*]

Downloader is a tiny and handy tool that lets you silently download and execute any file(s) on PC, without the person even noticing it!
