Nice job on this. looks very interesting.

Weco - October 30, 2016, 5:10 am

This looks really nice. Posting here to come back later.

Televisor - October 30, 2016, 6:19 am

I'd buy if there was an advanced mining bot.

Damighty - October 30, 2016, 7:02 am

Very interesting. What are the limits of it? Can you give some examples of what it's capable of, videos and such? Looks worth buying though.

Aese - October 30, 2016, 7:11 am

I bought the first version of it and I bought this before it was even finished! Its awesome with constant updates

10/10

Abducted - October 30, 2016, 7:35 am

Any vouch copies given away for this?

Creating videos right now, hopefully that will explain a lot about the bots possibilities P:

(Oct 30, 2016 06:19 AM)Televisor Wrote: [\[CITE\]](#) I'd buy if there was an advanced mining bot. It can mine, kinda, well at least plugins can make it mine. I'll try to add mining functions to the macro system, so non-coding people could also use it.

Thanks for the vouche.

SIM-3092442 - October 30, 2016, 9:06 am

I bought this ages ago, can I have the updated version? I have you on skype

Wespa - October 30, 2016, 9:44 am

Seems pretty nice.

GLWS :)

Covalent - October 30, 2016, 10:13 am

Plexcoo - November 14, 2016, 4:04 am

I bought this product just yesterday and it's working absolutely flawlessly. Very easy to setup and have experienced no problems with it whatsoever. He even gives you a few alts to use with it to start you out!

Huge vouch for OQ Minebot, this is a fantastic product.

What is the point of path-finding, is it like to find entrances to certain places?
(not trying to be rude, actual question ?)

It can be used to navigate to certain positions you don't want to walk to, it can be used in conjunction with other functions (walk here do blah) as well as it can be used for parkour stuff just for fun. Lots more uses but that's the top of my head

OnlyQubes - December 4, 2016, 9:53 am

There was a problem when updating from one of the first versions. If you are having trouble pm me on skype or on hf and i'll send you the updated version. (after that auto updates should work)

Nerdydoesstuff - December 5, 2016, 5:46 pm

Bought it and it's pretty good. Few bugs but he's quick to respond and worth the buy. easily fucks with servers

Trip - December 5, 2016, 8:12 pm

Is it one of those that mines cuz your a lazy fuck, or one of those shitty ones where you think your a cool kid cuz you can get a bunch of bots to join?

If you took a few minutes to look at the thread more carefully, you can find a video showing off all the functions of the bot.

Baitable - December 7, 2016, 8:45 am

Bought it!

I can definantly vouch for this product, it is amazing =D

Everything works like its supposed to, did some good trolling with 10 alts at once and also /kit starter dp's and paying myself a LOT on some servers =D

There is so much potential I suggest to buy now before it becomes too good, Pssst... alt checker + proxy support coming soon =D

I bought this a couple days ago and it is awesome even though it's still in beta! A few bugs, but that's expected and will be worked out soon. Qubes I think starting a Skype group with all your customers would be cool, because everyone could share macros, plugins, and stuff like that!

That's a good idea. I wouldn't mind a Skype group either.

I asked Qubes on Skype if he wanted to host one and he seemed to be reluctant for his customers privacy, but if anyone wants to join even if you haven't bought the bot yet, PM me your Skype name and I'll host one, so we can share our ideas and even play Minecraft together with all of our bots ?

ieatyou1 - December 10, 2016, 12:42 pm

Looks good, there's a few spelling mistakes and lexical errors in your TOS though.

j10max - December 11, 2016, 7:20 am

What will make it "revolutionary" is if you make a mod that can connect with the bots (i.e. sockets) and pass through commands. For example, pressing middle click and settings the bots to cut down the trees you select with the mouse pointer.

If this bot is still alive in the summer, I'll create the plugin to do this myself!
