Thread: [\[EVERYONE\] Vanity/OG BTC Addresses](#)

Riyu - October 30, 2016, 1:13 pm

I'm willing to generate you a short, 4 letter case sensitive or 5 letter case insensitive for free.

Example of an address: 1RIYU8KiRzcqWx5tXmvxRhdLcXtYHjzzY (4 letter case sensitive)

You can import these keys into blockchain.info, Electrum, Bitcoin Core, Multibit HD and most desktop wallets.

To get your address, PM me.

Yes, I'd be having access to your private keys but they WILL be deleted

If you don't trust me then don't use the service.

TheChi?f - October 30, 2016, 1:14 pm

No one should trust you with this service.

Your address is invalid already:

<https://blockchain.info/address/1RIYU8KiRzcqWx5tXmvxRhdLcXtYHjzzY>

There is a way to avoid having access to the private keys. Research how to use vanity some more
^^

Requires the other user to not be technologically retarded and for them to have the same tools downloaded, so it'd make more sense for them to do it themselves.
