Hello friends, enemies and skids.

For a while now i've been having problems dealing with life.

I feel like everything is pointless.

Get a good education.

Get a fine ass bitch (done).

Get a job (lol eventually)

Get my own home.

Have a family.

Then you get sick and die.

Then your family sells the house and splits the inheritance.

Then your family dies.

WHAT IS THE FUCKING POINT!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Thanks have a nice day go fuck yourself cause your life is pointless.

Well, it looks like you need to do some soul searching.

Try finding something you enjoy doing, and possibly try making it into a living.
