So when I was checking out [this thread](#) I noticed there was nothing about the spoiler tags in the help doc. <https://hackforums.net/allhelp.php> Is there a reason to this or was this just a mistake?

There's a few other things like this, such as the hr line

It may have been that Omni added them in after he made the help doc(s).

It's not in the [MyCode Help Docs](#) either.
Seems like they're a bit outdated.

I just never added data about custom mycodes. I suppose I can one day get it done. We have lots of custom mycode here.
