[Ewhoring Guide : Traffic, payment methods, basics, packs & more!]

Hey there fellow ewhores!

I'm back with another guide, but it's a little bit bigger than my other one.

This guide is about all you need to know before you start ewhoring.

So read carefully if interested, and let others know and leave some feedback!

Enjoy!

INTRODUCTION

So before we start the big stuff, I'd like to say a few words.

This guide is made by me, and by my experience, there might be better guides out there, I know. But if you don't like this one, don't read it then.

I'm sharing this for new members and experienced members who search new methods or who want to expand their knowledge.

1: Basics of ewhoring

So, where do you start when you wanna ewhore? Right here!

Ewhoring is basically selling "your" body online.

For ewhoring you need to make yourself a whole new identity, a female one preferably.

Where to think of when making that identity?

First off all a name. Get something sexy, appealing.

Like Lisa, Shannon, Alexis, etc etc.

You get me.

Then you need a place where you live, pick a country and search on google:

"Cities in (countryname)" and pick one, easy as shit.

ALWAYS stick to that info. You don't want people to identify you when giving wrong info.

Also your age is VERY important.

Also stick to that. I recommend you get yourself a good picture pack first, and choose an age that

fits that girl. (duhh)

So once you have all that and you understand it, it's time to work on your SE skills. Social Engineering.

Social engineering is very important when you want to ewhore.

You want to convince people that you are that girl, and that you desperately need that money for your rent or a new dress.

Make them want to want you, make them want to pay you.

There are some good threads on SE'ing on the HackForums. Use the search option and you'll get to it.

2: Choosing a good Pack.

When choosing a picture pack of a girl, make sure they're not taken with a camera, make sure they're taken with a phone, preferably iphone/samsung.

No old phones, that's too obvious.

Make sure that the pictures are of good quality, no blurry photo's.

Selfie pictures are a must, so are dressed pictures.

Ofcourse you need nudes too, and half nudes. But dressed ones are good to have too.

If you want to make more money, you also might wanna look for verification pictures, holding up 2 fingers, sticking your tongue out, holding up a paper with his name on, etc etc.

And optionally some videos, for greedy customers ;)

3: Traffic.

Depending on your platform you're ewhoring on, you need traffic to make money on.

Let's say you use kik, wich is one of the best things for ewhoring in my opinion.

You need atleast a kik account of your ewhore, profile pic and a nice, cute nickname.

If you're using iPhone, search "kik" in the appstore, and you'll get several apps that allow you to sign up for chats for kik. Get yourself 3-4 of these apps and you'll have 100+ traffic in some minutes.

If you're using android, i suggest you do the same in the playstore, but also consider signing up to site's on the internet. They provide some more traffic and you might be lucky to find an unsaturated website. ;)

Get ready for d!ckpics.

4: Setting up your workspace.

You need some thing before you can get started.

I suggest you get bluestacks on your computer, and download the old version of kik wich allows "fake camera" to work on.

Fake camera is an app that allows you to convert gallery pics into pics take with the camera. So in kik that would mean you send a live pic.

I suggest you make a second account, send all the pics you need for previeuw/dressed pics as a live to your ewhore account. From there you can forward it. This is ofcourse if you're planning on ewhoring from you phone.

If you're planning on ewhoring from your computer, you can do the same, to stop wasting time. I personally prefer using my phone.

5: Getting started for real now.

So once you've done all of that, it's time to do the real job.

You have your pics and traffic set, so let's start talking to you victims.

They probably start by saying "hey", don't just respond "hey" back.

Show some interests, say "Hey, how are you? ;)". See the difference?

This shows you want to talk and are ready for a conversation.

Talk a little and there will come a time where he asks "Wyd" or "What's up?"

That's the point where you say; "i'm kinda selling my nudies.. Need some money for my rent, getting kicked out tomorrow.." Or something like that, let your imagination work.

Convince them that you're real, if they want you to send a live preview, don't send a nude one, keep them wanting to see your whole body. Send one in bra or with your hand covering everything. Make it worth it so they want more.

If they like it, it's time to let them know the prices. Don't put your prices too high in the begin, start low-medium, see how much they sell. If you sell alot, try increasing the price. If you're not selling at all, your price is way too high.

And if they ask for verifications, just send them. The more they think you're real, the more you're likely to sell.

If you want quick money, skip the talking and go straight to "I'm selling my nudes, interested?". And maybe double dip him. (Further info about this later in the guide)

6: Once the sale is complete..

So once the sale is complete, you got your money and he got his pics. Everyone happy. Now, don't block that customer, he might return. Write his name down or make an excell file with his name, amount he bought and total money spent on you.

It's a good referall and a good motivation to look at.

Most of the buyers are likely to come back after a while for more.

So be prepared to send more, and earn more! ;)

7: Payment methods.

So, how would you get paid? That's always the biggest question.

Ofcourse everyone knows paypal, and amazon giftcard.

I personally prefer paypal, it's fast and easy, and everyone knows it.

But paypal is also a pain in the ass. They lock you're money without notice, and you lost everything. Either have a verified account where you can send the money to, or make a fake paypal for your ewhore, send the money to your real one or verified one, and you're safe. Just make sure you create these accounts on different IP's.

Amazon giftcard is great, since it's way harder to have a refund. And most people don't even know how to do it.

If you receive a payment using agc, you can sell it here on the forums to a trusted user for paypal or btc. I think the current prices are around 70%-75%.

8: The Double Dip.

If you're not familiar with the term "Double Dip", double dipping is basically scamming your customer. Telling him that the payment didn't come through, even if it did, and earn the money twice.

For example, Frank sent you 40\$ for your pics, and you tell him that paypal had an error and they refunded the money. He will send another 40\$, and now you have 80\$.

For a good method for this, check this out:

Thanks for reading, and feel free to leave some feedback/suggestions.
I'm also open for rep! (not asking for it)

Hello,

Thanks for guide, i am beginner and i find a lot of helpful points in your guide, the most difficult thing in whoring in kik is social engineering skills, and to keep cold head, without emotions not to get mad with all these times wasters asking preview, showing their dick before saying hello, it is really the jungle there...a lot of disapointements when you think that the guy will pay after building a good connection, and he just : i have to think or sorry i am broke!!))

I have earned around 250€ since one week, half Amazon, half money on paypal, i spend all my free time on this....4 hours every day in the week and 20 for weekend, i need to make progress to "smell" future buyers!
