Thread: [CRYPT4.ME - FREE File Encryption / Decryption.](#)

wiz - November 1, 2016, 11:29 am

Another free project provided by me for HackForums.net members!

[CRYPT4.ME](#)

This service allows you to encrypt sensitive files using multiple encryptions.
You can then share the file, the file can not be opened without using our decryption with the encryption key.

We don't have access to any files you upload.

Everything is encrypted!

This service is 100% secure!

Encrypt multiple files at once easily

Easy and Advanced Encryption mode

Analyse Encrypted files and display information like file hashes and file sizes

Secure technology with secure encryption ciphers to ensure maximum security

Opensource mcrypt encryption technology with all supported encryption modes

Responsive and unique design

Secure random string generator for secure keys

Free and fast first aid support for installation issues

Just remember to say "Thank you"

Hope you all enjoy this new service!

Over 50 files already encrypted!

the wolf of blockchain - November 6, 2016, 9:36 am

Vouch, I sent my stub here and I got one back, not sure if it's mine tho

You can click on the decrypt option, and use your decryption key and file.

You will get your file back in ZIP format :)
