Thread: [uid=3157603 ExploitTools is a scammer and was never raided by law enforcement](#)

Glyco - November 1, 2016, 4:01 pm

Recently it was announced by the Offensive Ware team that [Exploit Tools](#) and crew members of his team were raided and all there assets were seized thats to what accoriding to his [support team said](#)

Now for starts as of many of you who probaly are not aware of OffensiveWare brand was developed by same crook who developed the Aaron Remote Installable Keylogger (ARIK) and Ancalog Exploit Builder.

(Proof <https://hackforums.net/showthread.php?tid=5386213&page=7>)

Also I'd like to also point out OffensiveWare aka Ancalog Exploit builder uses an alternative website to make sales outside this forum its called

<http://remote-keylogger.net/>

Here is the Whois information about it

As you can see both of the domains are registered under the name "Horodko Toiasz" who may that be idk, but he/sure has control of OffensiveWare and Remote-Keylogger. And if you were raided by law enforcement dont you think they would take down all your sites and not just one lol? Anyways moving on

I needed more proof to see that they were in fact not raided, so I set out to email remote-keylogger support. I posed as a curious customer who was intrested in buying on of their products and he emailed me back picture is below

<https://gyazo.com/54e9947ae93d1c818cbdc87198ae778e>

I have no idea why he replied back to me with perfektsoft@gmail.com

His google profile <https://gyazo.com/184e1669b2b1b984496e1fa62e42b042>

But as you can see it is still definitely him. For a conman he really is bad at hiding his tracks lol.

Exploit tools if you read this as you can see you have been caught red handed. If you want to make things right please refund me and everybody you have scammed

wh420 - November 1, 2016, 4:38 pm

All it takes to verify whether or not the person was arrested is to check out pacer and see if their information is in there...easiest way to verify it. Don't even have to know their name, can connect the dots from the crime they were brought in front of a judge on.

The only time information isn't on pacer is if they weren't arrested or they rolled over on someone in which case it would be up there and then removed after.

Backopy - November 1, 2016, 5:20 pm

Either he's also a Psychologist or he created a site for a Psychologist because ego-centrum.com is also owned by the same person a/k/a "ExploTools" on HF.

He also owns Perfektsoft.com and Chrometm.com

See [THIS](#) interesting extract;

Spoiler [\(Click to View\)](#)

Code My activity before moving to Gdansk

I have received several inquiries about their experience of working in the service of computers. I decided to answer these questions on their website, which I am doing :).

My name is Tobias Horodko, I'm 26 years old, my home town is Elk student city is Olsztyn, and the current place of residence is Gdansk.

Let's start from the beginning, ie since 1998 (I was 13 years old), when I received a gift in the form of an old computer of "Amiga". I served mainly to play primitive plays such as ping-pong. After a short time I started to get bored, and innate curiosity led me to dismantle computer parts. So too I did. Of course, the computer failed to make a back :) Thanks a valuable experience, me interested in computers, and the harmony that prevailed in the middle, It made that seemed to me to be very interesting devices.

Another hardware which I was able to bring from Germany (I found it on the so-called. "Exhibitor" on the street), a PC with the following parameters: Pentium 100 Mhz, 16 MB RAM, hard disk with a capacity of 500 MB, which at that time was " average shelf. " After some time of use, it also stripped, but this time I did it in a thoughtful and aware. I even managed to install Windows 95 on it, and after some time - Linux. In the end, however, and the equipment ended his life, probably by the fact that I was not gentle when he undressed :) Another equipment was also of German wystawki, its parameters allow for the installation of Windows 98, which allowed for more effective learning the software.

In high school, I was already firmly "familiar" with computers, so that, together with colleagues assumed ECPWO (Elk Centre for Promotion of Free Software), where each of us, special lectures, discussed various areas of operation of servers, systems and programs. Recently found a website <http://tobiaszhorodko.fm.interia.pl/> . It was the official website of our association. Of course, the association no longer exists, so the site is the only remnant of it. One of the biggest projects we have completed in the framework of the association was to establish a computer lab with equipment transfers from sponsors (mainly Center for Practical Education and Learning (CKPiU)) in Elk. In this case, we have reached an agreement with Mr. Jacek Mrozek, who to this day is my mentor.

Workshop consisted of several Macintosh computers, was located in a small rural primary school in Rozynsku near Elk. To this day I remember every time you open the studio ran for our old VW Transporter (cucumber), a group of children enjoying themselves that they will have the opportunity to have fun playing on our computers :)

High school is over, the next experience with computers won in the School Junior Specialists Training Center of Communications and Informatics in Zegrze.

The next step was to start studying at the University of Warmia-Mazury (UWM) in Olsztyn, majoring in Education in Technology and Informatics (ETI). In the meantime I completed several courses thematically related to information technology and entrepreneurship.

During the three-year stay in Olsztyn, I dealt with the provision of ambulance services as a computer under the name Student Computer Repairs (SNK). I won in this period extensive experience solving hundreds of problems, serving nearly 300 customers.

Due to the great interest in my services, I decided to start IT company aptly named "HEYTECH" (www.heytech.pl), which is also pretty successful on the market. Some time ago I decided to move to Gdansk, and run here the emergency room computer "PC Doctor" and that's what I'm doing at the moment :)

I hope that my resume you not bored to death, and that by dividing it with you, my little credibility to advertising "elite services." Regards - Tobias Horodko - PC Doctor

Keywords: Gdansk service of computers, repair of computers Gdansk, Gdansk services, computer Gdansk,

2FA also isn't activated on his account and he has another IP he's logged in from, same ISP though.

2FA also isn't activated on his account and he has another IP he's logged in from, same ISP though. I don't really understand you the day Exploit was "raided" where did you get your source from?

<https://gyazo.com/bf7b48672d8fb72e26e60fd237e9b67d>

And also how come when I asked you for v5 you told me you can't give to me because you have no affiliation with the project?

<https://gyazo.com/3ca5b6a46164a16eaad709173dff51ab>

How can you take over a project if you don't have any affiliation with it?

Backopy - November 1, 2016, 7:32 pm

Posting private messages outside of the deal dispute section is against HF rules. I'm also completely unrelated to this situation.

Stop harassing me via PM.

Glyco - November 1, 2016, 7:45 pm

Stop harassing me via PM. I am not harassing you I am asking you a question which I still have not received answer for. You got yourself involved since the day you said you said you might consider

taking over his project. And now when I asked you if you were considering it you told me you had no affiliation. THAT DOES NOT MAKE ANY SENSE!!!! Do you want to please the fith on this or answer my question? I feel like I should also to this report Because now I am feeling that you knew about this the whole time that he wasn't raided. There is so many questions in my head I don't know where to start

Codefuser - November 1, 2016, 8:09 pm

Interesting investigation, will follow this thread.

SIM-2502833 - November 1, 2016, 8:13 pm

posting to see developments

Glyco - November 1, 2016, 8:41 pm

Stop harassing me via PM. Please show me a rule that states so?

Anyways, some stuff I knew:

<http://remote-keylogger.fr/>

<http://remote-keylogger.de/>

<http://remote-keylogger.com/>

Well if he "abandoned" these projects i.e. his PC did not have access to the credentials/accs where their domains/hosting are linked then I doubt it will be taken down. But yeah, a logical approach says all their domains/hosts should have been suspended

Glyco - November 2, 2016, 7:13 am

I'd also like to add to the record ExploitTools has come online yesterday

Please give me my money back dude :(

FUSION - November 3, 2016, 2:49 am

Maybe FBI recovered his hf password during the investigation?

The HEYTECH Toiasz Horodko is a IT company (domain registrar), not a person

<http://www.yellowpages.pl/en/businesses/firma/heytech-tobiasz-horodko>

I sent message to contact@remote-keylogger.net and support team tells me that offensiveware coder written them Aaron Remote keylogger 3 years ago. ORK keylogger is similar with Aaron, so coder probably use the Aron codes to make ORK keylogger.
