Thread: [Ispy Keylogger with Data protector Crypter](#)

Polex Daisy - November 2, 2016, 8:53 am

has anyone tried using Ispy Keylogger with Data Protector crypter? What is the best Settings..As i get too many Empty PC's or researcher PC's ..not good logs..

Can anyone share the best crypter for it??

Daisy

shoto4meeee - November 2, 2016, 10:13 am

well i have not used data protector recently, it used to be good before but i don't know about now, i will suggest you ghost crypter or cyber seal

server24 - November 2, 2016, 11:55 am

whr can I get data protector ??

rafadon - November 2, 2016, 11:26 pm

i just stopped using data protector for ispy. the crypter is FUD but it is rubbish. I have done all setting and spent the whole 45 days access to make it work but never. Once u crypt ispy with data protector, the stub never sends logs either to email or ftp. The stub does not restart when computer is restarted. so that crypter is a total waste. i was paying 75\$ monthly - wtf. Now i bought a crypter from devil for 15\$. it works perfectly.

darkman121 - November 3, 2016, 5:57 am

from data protector owner

(Mar 24, 2015 10:38 AM)n0\$f3ratu\$ Wrote: [\[CITE\]](#)

If you are using Hawkeye shit then please stop contacting me about purchasing or support. That is the most shitty logger i have EVER seen on HF.

???? - November 3, 2016, 3:25 pm

Why don't you contact the owner instead of making a thread??...

rafadon - November 4, 2016, 2:48 am

because of SCORPION my good friend, i will delete my comment here. I wasted 75\$ on that crypter. People, go and buy HawkLogger by scorpion. The logger has just fetched me 4k\$ from a client. nice one.

Your getting sumtin wrong bro... Data protector works perfectly with ispy.. Use compress option and use itself to make it work

sirture - November 9, 2016, 3:49 am

Who has used ispy, need to know how it work?

rafadon - November 11, 2016, 2:58 am

I have used ispy. It has a webcam logger which is rare. However, you need a crypter to hide ispy.
