Thread: [\[showcase\] OQ.MineBot - pathfinding/macros](#)

OnlyQubes - November 3, 2016, 2:30 pm

Hey guys, I'm re-uploading the videos on here, because the last thread got deleted, as it was a "sales thread" (even though it wasn't, really, it just had pretty design).

Pathfinding:

[Video: <https://www.youtube.com/watch?v=pwUt7YUzOXg>]

Macros:

https://www.youtube.com/watch?v=NLf_b3aDYGA

A more in-depth macro tutorial will be coming out soon.

If you have any suggestions for the bot post a response, i'll try to implement some of the ideas from you guys.

Frankey - November 3, 2016, 2:32 pm

That's actually pretty cool. I do not play a lot of Minecraft anymore, but this is sick. The best part by far is the video length :-)

OnlyQubes - November 3, 2016, 2:39 pm

Thanks :)

Also the 420 meme happened accidentally, didn't notice it until I got it on youtube.

Thats what they all say ;)

fleckzter - November 3, 2016, 3:30 pm

Pretty cool you're back and making stuff for a shit community ;)

OnlyQubes - November 4, 2016, 8:47 am

Yeah I'm back. the community is pretty bad, but hopefully it will get better.

Blasted - November 4, 2016, 9:26 am

That's really cool. Welcome back! What else are you planning for this bot?

OnlyQubes - November 4, 2016, 1:50 pm

Currently the next step is finishing all of the components for the macro system, here is a list what will be added:

Entities:

- look at closest (mob)
- attack closest (mob)
- use closest (mob)
- look at closest (player)
- attack closest (player)
- use closest (player)

Player:

- shift/unshift
- look (direction)
- path (forward)
- equip (best)

Inventory:

- crafting
- add to chest
- right click item
- select opened container slot
- eat selected
- has item id?

World:

- Mine at (position)
- Mine at (Direction)
- right click chest
- Is at (+tolerance)

Misc:

- Complete message (tab)

Also will be creating plugins for xp farming (kills mobs in farm) and farming (like carrots and stuff).

Cool, that's a lot more than I expected. I'm pretty hyped to watch this progress, it looks so good already ?

keplar - November 4, 2016, 3:27 pm

Vouch for Qubes, bought this and the deal was extremely smooth. Don't hesitate to deal with.

XtremeBoy - November 9, 2016, 8:42 am

That's actually pretty cool. I do not play a lot of Minecraft anymore, but this is sick. The best part by far is the video length :-)

Why did you just copy Frankeys message?

EdgyRed - November 11, 2016, 8:35 am

Hello, it's Smith from skype

Also will be creating plugins for xp farming (kills mobs in farm) and farming (like carrots and stuff). I really like this, it's sort of riptide+hydro, polished up, and 10 times better. You should team up with JavaProphet, I remember he was also working on a bot system, he already had path finding with pvp support set up very well.

Insolation - November 15, 2016, 1:35 pm

Vouch for qubes, bought this product, works very good!

Universwil - November 15, 2016, 3:18 pm

Sounds good thanks for the vouch I'll be buying it soon!

TheHolyTrinity - November 15, 2016, 3:51 pm

Nice job OP, this looks like a quality piece of software! The possibilities with a bot like this are endless.

Hetepheres - November 16, 2016, 10:30 am

idk it look pretty good ill try it, i wish you luck !
