What worries me is the customs.

Have this laptop, it's a beast. Looks sweet and the performance is equal to, if not better, than my desktop. Should be able to do nearly anything you need it to do + easy to expand storage. It's a little on the heavy side but for what you're getting, totally worth it. If you were selling this 2 months ago, I'd definitely be interested.

GLWS OP. Whoever ends up getting it is getting a sweet laptop.

Are you US? Since I'm UK ain't worth the shipping fees if you are but would be interested if they are not that high.
