I didn't made this thread on anime section because i wanted to read replies from users who don't watch anime. ?

i dont really see anything wrong with that

the producers are probably aiming for the age group 16-28 or smth, i dont see anime as being for children or smth like that, obviously it depends on what kind of anime etc. tho.

Sword Art Online, Attack on Titan and GATE are pretty good gateway animes I think. Pretty easy to understand what's going on and also high production quality.
