Thread: [Sombra has been announced! \(Full information\)](#)

Lufasu - November 4, 2016, 1:25 pm

First release was today (11/7/2016) PTR server.

[Video: <https://www.youtube.com/watch?v=Og5-Pm4HNII>]

Role - Offense Stealth and debilitating attacks make Sombra a powerful infiltrator. Her hacking can disrupt her enemies, ensuring they're easier to take out, while her EMP provides the upper hand against multiple foes at once. Sombra's ability to Translocate and camouflage herself makes her a hard target to pin down.

Abilities list -

Hack -Sombra hacks enemies to temporarily stop them from using their abilities, or hacks first aid kits to make them useless to her opponents. THERMOPTIC CAMOSombra becomes invisible for a short period of time, during which her speed is boosted considerably. Attacking, using offensive abilities, or taking damage disables her camouflage. TRANSLOCATORSombra tosses out a translocator beacon. She can instantly return to the beacon's location while it is active (including when it's in mid-flight). EMPSombra discharges electromagnetic energy in a wide radius, destroying enemy barriers and shields and hacking all opponents caught in the blast. Weapon - Sombra's fully-automatic machine pistol fires in a short-range spread. Full information -

Been quite some time since Ana was released, so I'm glad something else will help boost the game for a little.

I doubt that a little as she has been tested therefor Blizzard must think she's balanced. Anyhow, if she gets nerfed it's most likely before she hits the official servers.

Also, it's not 100% confirmed but I heard that her passive is that she can see enemies who are low health through walls.

so i just go back and max my mccree on europe :P

sm?ked - November 8, 2016, 5:32 pm

I have a feeling there is gonna be a little patch needed not too many days into this hero's release. Looks overpowered to me, I think it will be pretty well received by OW players everywhere.
#OldReaper2.0?
