Rocktop - November 4, 2016, 5:52 pm

Seems like a cool botnet. GLWS

Sw?er?ve - November 4, 2016, 5:55 pm

Good luck with sales in this vouch for OP

Moskva - November 4, 2016, 6:32 pm

Stop writing malware in fucking .NET you noobs. The only place your botnet should be is in the trash, along with every other .NET malware sold on this forum. .NET 3.5 (2.0 - 3.0) is not even enabled by default on 8.1/10, so you are limiting yourself to 8 and 7 unless someone has enabled it, which I doubt much no tech savvy people will.

Therm?l - November 4, 2016, 6:41 pm

(Nov 4, 2016 06:41 PM)Thermal the Prophet Wrote: [\[CITE\]](#) lmao bitch more skid, I don't see you coding anything
I code quite a lot I just don't sell it on HF. Can you prove that it is working on 8.1 and 10 without 3.0/2.0 being enabled?

Therm?! - November 4, 2016, 6:45 pm

(Nov 4, 2016 06:43 PM)Moskva Wrote: [\[CITE\]](#) I code quite a lot I just don't sell it on HF. Can you prove that it is working on 8.1 and 10 without 3.0/2.0 being enabled?
never said it did, but when 48% of people use windows 7, there isn't much need

Moskva - November 4, 2016, 6:51 pm

(Nov 4, 2016 06:45 PM)Thermal the Prophet Wrote: [\[CITE\]](#) never said it did, but when 48% of people use windows 7, there isn't much need
45% of all Windows traffic is now Windows 10 (<https://www.gosquared.com/global/windows/10/#launch>) over 200 million installs and growing, not to mention Windows 8.1 - So you are limiting yourself using 2.0. You may get some Windows 8.1/10 but not much.

caiveman - November 4, 2016, 7:05 pm

Fuck .NET botnets are disgusting
Features
- download and execute
- visit website

Looks like a botholder with dependences lol

?OPTIC - November 4, 2016, 7:19 pm

This looks like a really good botnet. Glws!

problems.x - November 4, 2016, 7:39 pm

I am OP's partner in this project. We are currently in the process of adding some sexy features, if you buy lifetime you can be reassured you will not be disappointed in the future.

Stixio - November 4, 2016, 8:27 pm

Oh snap, good luck with sellings this homie! :D

problems.x - November 4, 2016, 10:43 pm

Online for support now, HMU if you need assistance of have any questions.

Shanonnn - November 5, 2016, 12:45 am

Good luck with sales OP! Panel looks sexy!
Will be keeping eye on this.....

And for anyone bitching about .NET dependencies... Stack up your \$600 and go to exploit.*n.
.NET 2.0 is completely fine. Using it myself and i have no trouble with low execution rates.

rezzex - November 5, 2016, 1:17 am

(Nov 4, 2016 06:45 PM)Thermal the Prophet Wrote: [\[CITE\]](#) never said it did, but when 48% of people use windows 7, there isn't much need
Thats a joke right?

caiveman - November 5, 2016, 1:40 am

(Nov 5, 2016 01:17 AM)rezzex Wrote: [\[CITE\]](#) Thats a joke right?

Unfortunately OP and his circle jerk club friends are manipulating the HF skid community for a measly \$25.

Orange Kief - November 5, 2016, 1:46 am

A http botnet coded in .NET 2.0, Sounds good.

LordCoder - November 5, 2016, 1:47 am

There are no vouches, not even fake ones from group friends. If you want me to review it deeply, let me know.

The Purple Vulture - November 5, 2016, 1:58 am

hm looks like a good botnet , good luck with sales buddy ?

Ha Haaa - November 5, 2016, 2:38 am

Why is the .net dependency ticked lol when it's a downside to it...

Moskva - November 5, 2016, 6:53 am

Did you not read anything I posted, if you spend money on a EK and you are using .NET you should be hung. My machine has the latest Windows 7 updates on a fresh install and it does not have .NET 2.0/3.0 just 4.5 so if I wanted to run any 2.0 I would need to download it. MS would prompt me telling me a feature is missing.

If I got that after visiting a website I would just close it making your EK ineffective as fuck. The same applies for Windows 8.1 and Windows 10, most fresh installs do not have 2.0 and even if they did they would have to enable it and 4.5 has priority.

Now tell me again how effective your EK is with .NET malware? You should be using native. Your malware would stay FUD for longer, it could actually escape VM's and sandbox and it would have pretty much a 99% chance of infection. The reason why people sell .NET malware on here is simply because they don't know how to program in C/C++ or Delphi, etc.

These guys posted before that they were selling C++ crypter source that they found and didn't know how to use it, which leads me to believe that this C# is a source they found and edited. I don't really know what they are doing and if they were serious about malware then they'd not write anything in .NET.

C# and .NET are not bad languages they are just not suited for malware and anyone who wants to use a botnet or infect people with RAT's they shouldn't buy the .NET crapware sold on here by everyone, it is useless.

I'm not slating OP or the product as I haven't used it, but I can tell anyone 100% that it is not worth it. If you want to waste 25\$ that's up to you, but don't complain when you get a low execution rate and your botnet is unstable.

-TylerTheCreator - November 5, 2016, 6:55 am

.net botnets are shit, and shit like this keeps flooding the market.. smh

(Nov 5, 2016 06:53 AM)Moskva Wrote: [\[CITE\]](#) Did you not read anything I posted, if you spend

If you want to waste 25\$ that's up to you, but don't complain when you get a low execution rate and your botnet is unstable. Agree. I can't tell you the amount of times I've told .net Mal ware coders the. Net is just not suitable and EVERY SINGLE ONE of them say it's not a problem. They say it's a 98% execution rate compared to 99% with native Mal ware.

But your right. The reason it's .net is because they do not know how to use real native code. They just wanna code a simple .net and make money.
.net is the very last thing you wanna buy. I just gotta Uninstall it and then the rats gone haha.

Therm?! - November 5, 2016, 4:17 pm

So you actually can report people on this forum for stating their opinion on your product? For letting potential buyers know that the product they are buying might be shitty?

Damn.

Therm?! - November 5, 2016, 4:39 pm

Online now for support. Cheers.

Therm?! - November 6, 2016, 7:01 pm

Working on adding new features :)

Get it now before the price rises

Codefuser - November 12, 2016, 11:24 pm

All of you sellers keep saying secured panel.

Why not publicize it then? Just yesterday I found CRSF vulnerability on the webpanel of one botnet, and I suspect SQL Injection is possible too.

caiveman - November 12, 2016, 11:30 pm

Vouchhhhhhhhh lemme see the demo panel

HackforumsGOD - November 22, 2016, 7:39 pm

Looks nice good luck with sales bud

Wolf of Wall Street - November 22, 2016, 7:41 pm

Looks pretty nice to be honest.. gl

Therm?! - November 22, 2016, 8:55 pm

thanks for all the vouches boys

Therm?! - November 24, 2016, 10:43 am

Going to be online most of today incase theres any turkey day buyers

Armada - November 25, 2016, 12:19 pm

Seems like a clean small efficient bot.

C# from scratch is also very nice, windows compatibility all over the charts there.

Koodex - November 25, 2016, 12:28 pm

I stopped doing BH stuff a while ago but I must admit that I'm really tempted to buy this.

Therm?! - November 25, 2016, 4:24 pm
