Graybyte - November 5, 2016, 2:20 pm

I am looking for a good private server to get back into the game. I am kinda playing on Runique and the Alora(IGN for both: Spektrax). I am just curious as to what you guys think is the best server. I am not too into PKing but am not against it, I just dont know how all that well.

A very subjective question. There is no best RSPS. All RSPS generally differentiate from each other.

If you like custom items, Dreamscape317 is a wonderfull server.

It has a great community and a wonderfull staff team. Staff gets picked individually by the owners of the server and the community has their say in it.

daily around 100 online and 100's of custom items.

join us and give it a try! dreamscape317

Alora is quite fun - do you dislike it?

I agree with this statement, currently the best RSPS out!

all of the current ones are shit

rioscape was alright but got incredibly boring as there was no community based events and it was an eco server

i remember 317s back in the day like runeland and projectX, they were the best imo

Yeah, there is no need to play any 317 rsps since oldscool came out, nothing beats the original. I also don't trust private servers anymore because I ALWAYS got ratted when I was younger and I played alot of rsps.
