Should i be watching the subbed version of this show, or would it be better for me to just wait for the dubbed episodes to be released?

Watch the subbed version now instead of waiting for a bad dub to come out

I'll wait for some more people to give some input but i've seen the first two in subbed, i don't really watch anime like that though.

Some other shows i've seen include: Helsing: Ultimate, psycho pass, one punch man, bezerk(original). i need some suggestions too

Well since the anime is still in production and is still coming out this season... you won't see a dubbed version for a long while, so sub is you're only option atm.

When I first began watching anime I usually preferred dubbed simply because I wasn't really interested in anime much.

However, I highly suggest you watch subbed, there is so much more emotion in the voices.
