Thread: [Easier Way To Post Images?](#)

funtela - November 5, 2016, 5:00 pm

With the new https rule it's a pain taking screenshots and having to upload to imgur and then getting the link.

Is there a faster way to do this? lol.

Prawnster - November 5, 2016, 5:00 pm

Use an SS tool (like sharex) that uploads it to imgur automatically... Might work :D

LastSession VII - November 5, 2016, 5:01 pm

You can use gyazo . <https://gyazo.com/search>

Or vgy . <https://vgy.me/>

ShareX does work it's what I use to take screenshots and you can upload them instantly with the new https filter. Gyazo has https support too.

TheVBScripter - November 5, 2016, 5:01 pm

Gyazo.

I just click the icon in the taskbar (next to start) en start dragging the area which I'd like to screenshot.

Then it's uploading to a site where you can copy the link (it'll copy automatically, but you can copy it partly by hand). ?

Edited: Just like this*

click here to see the Gif, how it works [\(Click to View\)](#)

*The white screen is the page where the screenshotted area is uploaded too.

minimalist - November 5, 2016, 5:01 pm

Yeah: get [ShareX](#), copy the image, and then paste it into ShareX. You instantly get an embeddable Imgur direct link.
