Thread: [How to livestream with PS4 \(Tutorial\)](#)

Lufasu - November 5, 2016, 7:17 pm

So , lets start.

1. The PS link to Twitch:

Click the share button and then on the options and go in to share settings

Click on the broadcast settings

Click manage account information:

Details:

Option 2-broadcast quality (explanation below)

Option 3-allow your photo camera broadcast

Option 4-enable the live microphone hearing

Option 5-enable the display of comments on the broadcast screen

Now , click save twitch account information (recommended).

Now , go to twitch.tv through the PS and register/login.

2.Stream Quality

To change the quality of the stream go in to the broadcast setting as detailed above and then on quality

3.Stream Broadcast

when you are in a game, press the share button and then the broadcast gameplay

Choose your favorite option to stream and start streaming.

Options detailes -

1-enable broadcast camera

2-Live enabled microphone

3-enable the display of comments on the stream screen

4-The title of the stream

4.Stop streaming

To stop streaming just click on your share button and press 'stop broadcasting'

Thats it guys :)

Hope i help to some people that want to stream and dont know how to start/setup.
