Thread: [I want to pay people in BTC to gamble? Up to \\$20?](#)

Konulaba - November 6, 2016, 7:03 pm

So I get bonus cash if someone signs up, up to \$100. It's just bonus money I can't cashout unless I win and you have to bet like \$1000 per \$100 just to even get it, but you could win and keep your winnings. Nonetheless.

I want to pay people 20%-ish (up to \$20) to deposit money and use me as referral. If they deposit \$100 the second I get my bonus dollars (instant when they get theirs) I'll send them 20%-ish of the amount back to them in bitcoin.

Where can I post this? It's a referral I guess but paying good money for it. Thanks!

For the people you will be paying to deposit, will they be able to just withdraw as soon as they deposit? Or do they have to make bets or whatever?

Mr. Giftcard - November 6, 2016, 7:26 pm

How many times do we have to wager our deposit?

Konulaba - November 6, 2016, 7:32 pm

See not sure there, I mean I'm sure it's better if people actually play. I'll have to ask the site. One thing is you need last 4 of ssn, as this is a legit gambling site, so you have to be 18+ to do this, idk if that's just America or what it yeah. Someone that's like 16, can't just go make a free \$20 and be done you know? Need to be 18+ not sure about the bet part like if my bonus goes away no point in doing for me of course.

I'd be interested in this PM me more

TRAUMA - November 6, 2016, 7:40 pm

Kinda confused..

So you're saying.. I deposit \$100..

Don't have to gamble it..

You withdraw your bonus..

I withdraw my \$100 without gambling..

You send me \$20?

wtf dude this will not work and u will be the only one who will profit

Konulaba - November 6, 2016, 7:42 pm

That's the thing. I need to ask support, i know I get my bonus instantly before you even gamble, but if you withdraw instantly, if I won and go to withdraw I wonder if I'll have any issues you know? Need to figure this all out. Am curious where I'd even post it lol!

mvmt - November 6, 2016, 7:42 pm

I highly doubt the user can withdraw his \$100 without playing at all, and you still receive your bonus.

Actually no. It's bonus money. You can't withdraw it. You have to bet \$1000 per \$100 you get of bonus, that's a lot of betting, and in that time if you lose you lose. I'm paying 20% at a chance to even win. If I got \$500 and gave them all \$100 total, and lose before I bet a total of \$5,000, I lost \$100. It's not easy. It's poker too. Not easy money lol.

That's the thing. I get my bonus the second his money confirms, even if he didn't play yet. But I wonder if I would run into an issue if I'm lucky enough to withdraw.
