Anyone here is into old games?? or knows where to download a bunch of them all together?? it's getting kinda annoying to download them 1 by 1, specially with the large numbers of those good games =,="

Just find a torrent for them, in the usual place. Emuparadise also has fullsets.

I was more like looking for good collections, don't want to download tons of them only to find that they have couple decent ones.

I just bought a PS2 if that counts as old now.

I got loads of playstation original games and some playstation 2 games.

Gonna try them all out again.

I wouldn't really count PS2 as that old yet, many people still play it, but the old games from sega barely have anyone playing around.

There is bunch of sites of online retro games, like classic-retro-games, I recommend you this one ;)
