haha i really want a rematch between them , but uhm .. nevermind ?

updated the design ,
i hope you like it guys ..

The chest looks very weird due to the hard shadow which makes the nipple and other parts look out of place. I would emphasis more tonal value in this area to bring out more structure of the body. The nose seems nonexistent due to lack of shading and the lips look oddly crooked at the top-bottom. Everything looks to be in the right place and this has some nice qualities to it, just needs more tonal depth and shading in the right places to show structure.

yeah you're right , maybe it needs to have a lot of layers on shading .
thanks for your comment mate , i appreciate it .
