Thread: [Do you guys know any websites to practice java?](#)

ihatemylife - November 7, 2016, 4:33 pm

I'm looking to improve. Bonus points if has a structure way of teaching and learning stuff

Nachfolger - November 7, 2016, 4:34 pm

Pretty sure codeacademy.com has some.

The way I learned was jumping right into android development.

CountZero - November 7, 2016, 5:08 pm

codingbat, it's a good website to learn basic building blocks of java

GammaG - November 8, 2016, 7:40 am

I like Hackerrank -> <https://www.hackerrank.com/>

I would not advice a website, just because they don't learn you how to use the syntax. For example: Codecademy gives a basic of the syntax, but not how to use the syntax properly.

If you really want to learn Java, go get a book. I can send you a pdf file of a book I used for school.

NapoleonicCode - November 8, 2016, 10:37 am

I would recommend you thenewboston youtube channel for learning Java, if you are looking for videos. The guy running it is funny and really good at explaining Java concepts ?

Blasted - November 8, 2016, 5:15 pm

I would use codecademy/youtube for syntax, and use books for the important stuff

Captain Steve Rogers - November 9, 2016, 2:12 am

practice java?

You mean to practice online?

www.javatpoint.com is what I have used.

CountZero - November 9, 2016, 7:43 am

You should honestly take a class, you learn much more and better understand it. I tried taking java online, and didn't understand it. I took a class about java in school and it helped much more.

I could agree on this for 100 %. Before my class in school started I tryed some online java tutorials and learning websites, but the thing is, you will learn about syntax but not how to use it.

It's oke to try some codecademy or something like that, but don't expect you will learn Java in a day or a few hours. Do some exercises everyday, try codecademy, try a book, mix these two things. Do some assignments and learn how to use Java properly.

HTID - November 13, 2016, 5:55 am

I use Udemy (warez disallowed) its good :)

SoyNuevo - November 13, 2016, 6:15 am

I've used codecademy, youtube, and Udemy (warez disallowed). But there are a lot of other resources out there

IEatWeed - November 13, 2016, 7:45 am

I've recommended codeacademy.com to my friends. Never used it myself though. GI

This ^^.

Complete this course and get knowledge of the basics.
