Thread: [Why Do People Pay For Macro Exploits When They Can Just Use Veil Evasion?](#)

Demoralise - November 7, 2016, 9:56 pm

Veil Evasion is free and still FUD, the shellcode varies each time and it is easy to modify anyway. Why pay for something you can get for free that is FUD?

bahstard - November 7, 2016, 10:57 pm

just wondering how this works. Can you enlighten me?

RobinHood96 - January 11, 2017, 7:17 am

I am agree with you but how i can see the code of my exploit create with Veil?

it just generates special python payloads and compiles them into exes with a compiler called pyinstaller which doesn't have any dependencies I believe so it should work on any comp completely FUD.

redlightrouter - January 12, 2017, 12:59 pm

Veil's payloads aren't fud anymore since morons are uploading it to virustotal and shit

And it was the .doc being detected, not the actual payload?
Because if it is FUD for real, I am certain to look into it.
