Wanting to build a forum similar to
<https://hckd.tech/>

Saw it yesterday that another user listed on here and I think it looks pretty fucking slick.

Seems like a simple theme to create, but the sidebar would be a pain in the ass. I would help you, but I got my own to worry about right now. If you do need small help though, I would be glad to assist you ? Been using MyBB for 6+ years, so I have a lot of experience.

Yeah rather new to MyBB but I just think it looks really nice - I mean a few tweaks here and there but overall it's so much better than all these other default looking pieces of crap going around.

If you're still looking for this I'll do it for free. That's a free MyBB theme on the website listed above.
