Thread: [Vape Expertise Needed - What box mod and Tank?](#)

Biker BoyZ - November 8, 2016, 2:44 pm

Hello, I am looking for some help on the Box Mods and Tank.

Im mainly looking for clouds and good flavor and smooth burn.

I am from UK so please, if you got anything to link. make sure its an legit shop from my area. I have been researching but theres too many to choose from

I got about 60 - 100£ Budget. I have a crappy ego but its more like drinking the juice than fucking vaping it.

NOTE: If you hate vaping, don't bother posting.... ?

Nadisty - November 8, 2016, 3:35 pm

You from the north or south? I recently got a Aspire Cleito with a Coolfire IV.

Tfv8 tank <https://www.elementvape.com/smok-tfv8-cloud-beast-tank> amazing flavor and lots of vapor.

Sigelei 200W <https://www.elementvape.com/sigelei-fuchai-200w-tc-box-mod> I have not personally used this box, but i have the 150w and its amazing.

SMOK 220W <https://www.elementvape.com/smok-x-cube-ultra-edition-220w-tc-ota-box-mod> Personally used this box for a bit, has tons of features including bluetooth. Would recomend for sure. only downside is the firing button is kinda weird as it is the whole side of the box.

Edit: Not sure if they ship to UK, they should.

Biker BoyZ - November 9, 2016, 9:56 am

Looks great but i would like some more suggestions. UK Sites if possible as well.

I second this. These are what I use in my setup. You really can't beat it at the moment unless you drip.

I have both Tfv4 and Tfv8, Sigelei 150w and can vouch for them.

Remember proper batteries if you are going to be sub ohm vaping, VTC4 or VTC5.

They are great coils as i hear. So the Sigelei and the TFV8? I was looking at the G-Priv Kit that comes with a TFV4

The TFV4 is pretty good. Just make sure that you get the right batteries as said before. Also, if you want to go to larger volume and larger clouds, the TFV8 would be the best way to go.

(Nov 8, 2016 04:35 PM)Nadisty Wrote: [\[CITE\]](#) You from the north or south? I recently got a Aspire Cleito with a Coolfire IV. That's exactly what I'm running with, except I have the Coolfire IV plus (or tc100, whatever you call it)

OP, any 40w mod with a Cleito and decent juice will do ya just fine.

However, I've found my personal sweet spot for most juices is around 50-60w.
