Thread: [\[EASY\]Easy way to Spread your RAT! + \\$atanrulze's Crypter!\[EASY\]](#)

qqwq - July 16, 2010, 7:46 am

Hey guys, I've been spreading my rat for a while now and I thought I'd share this with you.

Lets get started!

Step 1: Make a java driveby applet.

Step 2: Download yahoo messenger, or Meebo, or any chatroom with alot of people.

Step 3: Create your RAT.

After you create your RAT/Botnet, crypt it!(link below)

Step 4: Upload your rat and paste it into your java driveby applet.

Now, for the spreading.

Go to any Runescape related or RPG chatrooms, and just send them the link to your website, say its a private server, or hacks or something. I've gotten 200 victims in 1 day easily by doing this. Give it a try, my mate told me, and it works.. :D

Step 6: Have fun botnetting/ratting.

How to setup a java driveby:

Downloads: http://uppit.com/d3c3jns3l73a/Java_Applet.rar

Webhosting: www.fileave.com

First go to fileave and make a website with any name.

Then go to files and upload all of your java applets.

After you have done that, upload your RAT.

Go to files again, go to index2 and click on Edit.

Scroll down until you see something saying "POST LINK HERE", erase that and post your virus download link.

Then go all the way to the right and do the same, next hit Save.

Making your mini url website:

Visit dot.tk , post your fileave link that has the RAT/Botnet, and make any url you want so you can spread it easier.

Then you're done!

Another way of spreading is through uTorrent but I'm not going to get to that yet.

Good luck.

RECOMMENDED UPLOAD SITES: <http://directvirus.com/> It installs immediately.

Crypter: Stup update july 16th stub -
<http://www.mediafire.com/?43ydrclkc3jnid>

Without stub update
<http://adf.ly/3oRt>

Thanks to \$atanrulze for his crypter!

Jerry - July 16, 2010, 7:47 am

sweet tut man :D

thank you very detailed

botnous - July 16, 2010, 7:50 am

thanks for the tut.. pretty nice

Plutonium - July 16, 2010, 8:15 am

Uhuhuh, Not that very detailed. AND.. The fileave wont work since it doesnt support FTP upload. cough fail cough

qqwq - July 16, 2010, 8:16 am

(Jul 16, 2010 08:15 AM)Plutonium Wrote: [\[CITE\]](#) Uhuhuh, Not that very detailed. AND.. The fileave wont work since it doesnt support FTP upload. cough fail *cough*

Wrong? Thats why 10mins ago I made another fileave site? Don't believe me? auropk.tk check it out.

h3h3y9 - July 16, 2010, 8:16 am

sweet tutorial ;)

thank you for this noob-friendly tut!

qqwq - July 16, 2010, 8:17 am

(Jul 16, 2010 08:15 AM)Plutonium Wrote: [\[CITE\]](#) Uhuhuh, Not that very detailed. AND.. The fileave wont work since it doesnt support FTP upload. cough fail *cough*

Neverind.. and I never said anything about FTP.

Bok1ca - July 16, 2010, 8:18 am

Can someone explain me what is "java driveby applet."

Thanks.

Halo 4 - July 16, 2010, 8:20 am

Hate people like you...Just becuae the Tutorial isn't written by YOU it's shit.

Pathetic.

Anyway i myself think that it could work, i might give it a try. Thanks for the share.

~RampageUK

~RampageUK

Haha thanks for the feedback, just added a crypter.

MrNRG - July 16, 2010, 8:44 am

Nice tut mate.

Spoiler [\(Click to View\)](#)asfxvczbfgvdsgegvds

Wise - July 16, 2010, 9:03 am

Everybody seems to fall for these private servers, lol.

modhacker - July 16, 2010, 9:09 am

is crypter 100% fud?

22 sshhoorrtt

Wise - July 16, 2010, 9:10 am

(Jul 16, 2010 09:09 AM)modhacker Wrote: [\[CITE\]](#) is crypter 100% fud?

22 sshhoorrtt

It might be scantime, but it is not actually runtime on some AV like Kaspersky.

qqwq - July 16, 2010, 7:50 pm

Bump Just infected a guy with a level 80 in WoW :D

Aegmon4 - July 16, 2010, 7:56 pm

Are java drive-bys still working? I heard that they have been patched.

qqwq - July 16, 2010, 9:41 pm

(Jul 16, 2010 07:56 PM)Aegmon4 Wrote: [\[CITE\]](#) Are java drive-bys still working? I heard that they have been patched.

Noo, they are DEFINITELY working! I didnt even Crypt mine and it wasnt detected in AV lmao. and I have cybergate, if you want a java driveby, message me I'll be happy to help set one up for free.

0000DA???A?C???0000 - July 16, 2010, 10:51 pm

Is there any alternative to fileave coz it doesn't work on m y country
i get 404 error while signing up !

asiong - July 17, 2010, 5:43 am

guys is there a tutorial in youtube about this coz i realy can't get it ..:(..I registered in fileave.com i upload a tools and my server after that i can't see the index2:(and what is the use of java applets?..i hope there's a video of this thanks..

qqwq - July 17, 2010, 9:26 am

(Jul 17, 2010 05:43 AM)asiong Wrote: [\[CITE\]](#) guys is there a tutorial in youtube about this coz i really can't get it ..:(..I registered in fileave.com i upload a tools and my server after that i can't see the index2:((and what is the use of java applets?..i hope there's a video of this thanks..

Java applets : Whenever someone visits your .tk or fileave website, it'll ask them to run java. If they click "Run" your virus will be infected into there computer, It's called a Java Driveby

VipeX - July 17, 2010, 9:50 am

QQwQ MSN?

Want you to set up a JavaDriveby for me? =)

im not allowed to PM..

Dont open

Back in 10 minutes, out at the supermarket hunting food. Just PM the MSN to me please. Or something.

Spoiler ([Click to View](#))

....WHO HAS SHORT SHORTS? I HAS SHORT SHORTS...

qqwq - July 17, 2010, 10:28 am

Johnwrestling@hotmail.com is my MSN, Message me any time you want.

l1nuxfre4k - July 17, 2010, 12:12 pm

haha a idiot tried infecting me using this :D

qqwq - July 17, 2010, 12:20 pm

(Jul 17, 2010 12:12 PM)l1nuxfre4k Wrote: [\[CITE\]](#) haha a idiot tried infecting me using this :D
Haha.

This Message is too short so im wasting 5 seconds of my life making it longer. Damn.

KriiPtonicZ - July 23, 2010, 11:55 pm

Nice Tutorial, you know any RS chat rooms or RPG Chat rooms i could use?

Brutal Chaos - July 24, 2010, 12:35 am

Yeah, Java Drive-By's still work, they're just detected now by some AV's.

MFX - August 1, 2010, 12:54 pm

My avast dectects all java drive by's what i have been made, and why to fuck my avast says that updated stub.exe have trojan inside it. :/

Edit: And poster has reputation -3, no thanks!

rocketmn333 - August 1, 2010, 1:08 pm

This is genius, i want to get home from this vacation and try it, ive been readin the forums on my ipod, and this is the best spreading method ever, i mean you tell kids its a private server and hacks, and they run the java and bam, they infected

Gibson - August 1, 2010, 1:47 pm

OMG i have TONS of drive-by sites but no way of sending them! :D
thanks!!!

Tiwoodsta - September 10, 2010, 11:48 am

oh my fucking goodness...if I see fileave in another tut i'm going to freak the fuck out! is there any other sites like fileave that will work?!?!?

(Aug 1, 2010 01:47 PM)Gibson Wrote: [\[CITE\]](#) OMG i have TONS of drive-by sites but no way of sending them! :D

thanks!!!

your one fucked up individual. GTFO the site if your not willing to share.

Ownage96 - November 6, 2010, 3:27 am

doesn't work :(

Comes up with this stupid antivirus thing when i try to open the website

edit: Ok i got it to download but im still getting a java error...

is this index2 right
