This is a brand new keyboard, never used. I got it a while ago, but since i'm not really a gamer i've been meaning to sell it. This keyboard retails for around \$200 after taxes, and i'm letting it go completely brand new for a steal of a price.

\$130 BTC, shipped to US only. I do not accept bitcoin.

EDIT: I accept bitcoin now

From what I hear, this is one of the best gaming keyboards on the market, so get it while you can. PM me if interested.

Would you consider shipping overseas if the shipping cost was paid for?

\$170 on Amazon * .7-.8 for price of AGC = \$125-140 brand new factory sealed from amazon
Consider lowering your price, as this isn't a "steal."

GLWS.

I'll bid \$85 Verified PP
