Thread: [Simple Folder Lock](#)

Nitr0Sage - November 11, 2016, 8:42 pm

This is a simple Folder lock code I made?

I suspect that you already know how to make a batch file

If you don't click Read below (In windows)

Open notepad

click save as

save as FolderLock.bat

make sure to click Save as all files

now open the newly made file by right clicking it and selecting edit

copy paste the code

done

Code @echo off

::MADE BY Nitr0Sage

:start

cls

echo Would you like to lock a folder (Y/N)

set /p LU=

pause

if '%LU%'=='Y' goto Lock

if '%LU%'=='y' goto Lock

if '%LU%'=='N' goto Unlock

if '%LU%'=='n' goto Unlock

cls

:Lock

cls

echo Lock

pause

echo Name of Directory (Type EX for a full list of premade directories)

set /p Directory=

if '%Directory%'=='EX' goto EXamples

pause

```
cls
echo Name of folder
set /p Name=
pause
cls
cd %Directory%
cacls %Name% /e /c /d everyone
pause
echo Would you like to exit? (Y/N)
set /p BG=
if /I '%BG%'=='Y' goto exit
if /I '%BG%'=='N' goto start
```

```
:Unlock
cls
echo Unlock
pause
echo Name of Directory (Type EX for a full list of premade directories)
set /p Directory=
if '%Directory%'=='EX' goto EXamples
pause
cls
echo Name of folder
set /p Name=
pause
cls
cd %Directory%
cacls %Name% /e /c /g everyone:f
pause
echo Would you like to exit? (Y/N)
set /p BG=
if /I '%BG%'=='Y' goto exit
if /I '%BG%'=='N' goto start
```

```
:EXamples
cls
echo Examples
pause
echo *****
echo Desktop, AppData, Documents, Favorites, ect.
echo *****
pause
:LUO
echo press 1 to go back to Lock and 2 to go to Unlock
set /p LorU=
if /I '%LorU%'=='1' goto Lock
if /I '%LorU%'=='2' goto Unlock
if /I '%LorU%'==' ' goto LUO
```

```
:exit
EXIT
```

Hi ?

Just a little remark : about using IF command

You should write like that :

instead of using :

```
Code if '%BG%'=='Y' goto exit
if '%BG%'=='y' goto exit
if '%BG%'=='N' goto start
if '%BG%'=='n' goto start
Code if /I '%BG%'=='Y' goto exit
if /I '%BG%'=='N' goto start
```

Nitr0Sage - November 12, 2016, 5:00 am

Thanks Hackoo I will try that way.

This is the Update

Code @echo off

::MADE BY Nitr0Sage

```
:start
cls
echo Would you like to lock a folder (Y/N)
set /p LU=
pause
if '%LU%'=='Y' goto Lock
if '%LU%'=='y' goto Lock
if '%LU%'=='N' goto Unlock
if '%LU%'=='n' goto Unlock
cls

:Lock
cls
echo Lock
pause
echo Name of Directory (Type EX for a full list of premade directories)
set /p Directory=
if '%Directory%'=='EX' goto EXamples
pause
cls
echo Name of folder
set /p Name=
pause
cls
cd %Directory%
cacls %Name% /e /c /d everyone
pause
echo Would you like to exit? (Y/N)
set /p BG=
if /I '%BG%'=='Y' goto exit
if /I '%BG%'=='N' goto start
```

```
:Unlock
cls
echo Unlock
pause
echo Name of Directory (Type EX for a full list of premade directories)
set /p Directory=
if '%Directory%'=='EX' goto EXamples
pause
cls
echo Name of folder
set /p Name=
pause
cls
cd %Directory%
cacls %Name% /e /c /g everyone:f
pause
echo Would you like to exit? (Y/N)
set /p BG=
if /I '%BG%'=='Y' goto exit
if /I '%BG%'=='N' goto start
```

```
:EXamples
cls
echo Examples
pause
echo *****
echo Desktop, AppData, Documents, Favorites, ect.
echo *****
pause
:LUO
echo press 1 to go back to Lock and 2 to go to Unlock
set /p LorU=
if /I '%LorU%'=='1' goto Lock
if /I '%LorU%'=='2' goto Unlock
if /I '%LorU%'==' ' goto LUO
```

```
:exit
EXIT
```
