Thread: [Where are the Paid Minecraft Hack Clients At?](#)

pledged101 - November 12, 2016, 12:09 pm

I have seen that there were paid minecraft hack clients being leaked, like Tomato and Huzie. Where to you buy the hacks from? I have searched alot and can't find any legit sellers. Is there a forum where you buy them like HF? Or does each seller have there own website?

These VIP hack clients are suppose to be good right? Like they have private exploits.

Buy from people on b0at.xyz etc. Ask Tojatta maybe? You litterally just need to know the coders, and you can find most of them on b0at.

They might be willing to sell you their clients...

Clients tend to have their own sites, Vape for example has vape.gg

It's not as fun anymore due to the fact that even the shittiest servers have some kind of no cheat which stops most typical hacks. Hacking in MC now mainly consists of pvp hacks like autoclicker and cancer ghost clients coded in C++ (for some reason).
