There is no need for me to provide a vouch copy if linked a video where I test the program to prove its legitimacy. If I was to provide a vouch copy it would be a member with higher reputation.

DarkSwag - November 12, 2016, 3:07 pm

I can vouch for this product, I used it myself.

I'm looking into becoming a member on the support team for asvps with this project. As for now, please contact asvps and not myself until things are clear and set in place.

Hopefully all you users of InsTurbo don't come up to any issues when using, but if you do need any answers to your questions, or help with something you're stuck on then feel free to contact the current support contact methods.

Best of luck, and vouch for this product.

Null Agent - November 12, 2016, 7:06 pm

I can personally vouch for InsTurbo.

It works as advertised and support from Asvps is great as expected.

You can certainly use this on a VPS and get better results but in the near future I'll be looking to add a proxy feature.

Ultimate package \$20 for three months specifies a one week license. Mistake in the design or did I not read something I should have?

probably forgot to change that part once they copied the first table for a 1 week licence.
