Purple Kief - November 13, 2016, 8:33 am

Nice of you to do this.

However, don't lie to yourself lol. Nobody gonna do this for free, would take way too much time.

Vitruvius - November 14, 2016, 9:20 am

Please i need help with my RAT's

LUMINosity LINK or IMMINENT MONITOR...

I have been using these two for some time. But now i don't know.

Firewall and everything is disabled.

I have port forwarded well and have working DDNS.....

But for some weird reason when i test it on myself i get nothing.

Luminosity link keeps getting incoming connections from the opened port... i get up to 50 incoming connections that keeps increasing... what does that mean ? but the rat rested on myself shows nothing.

Imminent monitor,port is open and dns resolves to my ip..... when i listen to the port..... no incoming connection happens. It stays at 0 . And then when i test the rat on myself nothing shows.

I use different ports and vpn server locations for these two rats and i don't use them at same time. Any help please ?

Welp, I'm using it right now. Nope, you're not, you're just not as smart as me.

Edit: Yes, I have read the post about MS and No-IP (they seized their domains and what not for malicious activity.)
