Thread: [\[TUT\] How to hide your IP from resolvers on Linux \[TUT\]](#)

Define. - November 13, 2016, 12:13 pm

Hey, this is my first tutorial on here and today I'm going to show you how to hide your IP from Skype resolvers if you are on Linux. I found this tutorial online and decided to share it on here!

Step 1:

Code Quit Skype

Step 2:

Open a terminal and enter:

Code `cd /home/{linux username}/.Skype/{skype name}/`

Step 3:

Enter:

Code `gedit config.xml`

Step 4:

Find:

Code `<Account>`

Step 5:

Add:

Code `<PrivateSkypeMode>1</PrivateSkypeMode>`

After Code `<Account>`

Thanks!
