Thread: [Web Page needed ASAP](#)

jolindaprince - November 13, 2016, 2:48 pm

I need a user login page with Registration, the user will have option to upload an image, if possible have an sms notification.

I will Pay.

Anyone who can do this, please contact me. I need the entire file.

i haven't gotten such, i have search and got tired of searching before i opened a thread for it.

if anyone can get it for me.

i will pay.

I can do this for you. PM me with details.

Also, this is in the wrong section, mate.

SMS- notifications costs money to send right? Atleast you need to have a number to send them. I can make this system for you, how much do you roughly want to pay?

PM me your bill, we can then discuss

i can build a user login php page with database, but can't get an image uploaded to database.

What i need for is getting a registration page with user login that a user can upload his/her image.

after registration, once the user signed in, he/she will see his/her welcome page with his/her image on it.
