Thread: [\[HELP\] DARKTRACK V4 FAILED CONNECTION](#)

yosuasito - November 14, 2016, 12:17 am

maybe something wrong with my ISP, my pc, freedns--> I dont know..

i tried so many RAT, tutorial, every detail. and get diferent result.

i can post(comment) on thread DARKTRACK, coz im new member.

just one problem happening always. there is :

- 1) when i connect to 127.0.0.1 --->success!
- 2) when i connect to ddns --->failed!
- 3 when i connect to LAN ip(like 192.168.17.1)--->success!

here are the capture :

on DC-->(https://postimg(.)org/image/w12cuiv7x/

on Darktrack-->(https://postimg(.)org/image/qe0hakyh3/

just remove () on link to see

FYI :

what i have done :

1) signun in duckdns/freedns,download and succes to instal dan run it

2)i have disabled my AV and Firewall.

3) i have sucessfully open port 3080 or other.(proof on canyouseem.org and that pict(Darktrack) explain that work with localhost(127.0.0.1) and LAN ip(192.168.17.1)

4)my isp is fiberoptic(indihome in indonesia)

what should i do?

what did i miss?

NEED HELP, have 2 week with this problem.

Thanks in advance!?

NyQuil - November 14, 2016, 12:32 am

you said you disabled the firewall, did you also stop the firewall service afterwards?

yosuasito - November 14, 2016, 12:39 am

what do you mean "stop the firewall service afterwards"?

i just turn off my firewall.
