Tl;dr Would you buy it, what could I improve?

I like the idea, I just think the carrot should be a little more proportional if you're trying to give it the right look. The "leg" that's raised is almost twice the size of the other.

? both legs and arms doesn't have the same size

? edges are pixelated

? I don't understand the concept of the design (i don't have any idea why you came up with this)

? doesn't look like a carrot in a first glance

4/10 ?
