Thread: [Dragon Ball Xenoverse 2 | Coverage | Information | Guide](#)

Lufasu - November 14, 2016, 6:21 am

What's up guys? This review I bring before you today, I'll try to touch on several points that describe the game in general. I'm not going to score any game (the kind of thing I'm less attached to them), but I also came to the general background and points for my loved ones and not. "Dragon Ball Xenoverse 2" was released in late October (October 25 or so) and came to PC, Xbox One and for the PlayStation 4. My review will describe the game from the player on a PC, and therefore have to take the article Limited and proportionate.

Name: Dragon Ball Xenoverse 2

Developer: Namco Bandai Entertainment

Game platforms: PC, Xbox One, PlayStation 4.

Well lets go !! I'm reviewing the game, after I played it quite a bit and I got to the end and quite frankly, it did not take too long in relation to the amount of time spent just downloaded ..

In any case, the Xenoverse 2 I arrived by chance after seeing some of his trailers running on my playlist on Youtube. I managed to figure out how many views, okay, I want this. This forum a user posted straight game and jumped at the chance, I took off and started playing. The truth? exciting. Dragon Ball Xenoverse 2 takes us quickly into the plot and gives her pause for a moment. We play as members of a cell that protects the time and history (or her full name in the game, Time Patroller). Introduction to game shows Trunks, explaining the meaning of being a member of a cell that protects the time aimed to prevent changes in time and history, as well as give a few highlights and examples. Another central figure to accompany us throughout this time the Supreme Ki, highlighting certain rules that limit us for a certain time. What this actually means? I will give a simple example and detail: The game is built on the city known as the "Contron City", the city itself has a wide variety of tasks and people and one of the conditions there at the beginning of the game is that you can not fly from place to place, only more advanced stage. At this point I must say that still did not understand what the plot and where the game unfolds. I must say that I have not played in the previous game in the series, "Dragon Ball Xenoverse" so everything was pretty new and "adcni "for me. What did I like the outset it the music and tracks. Everywhere and in a different city, has its own music and melody, and there are several places that just liked to hang around the game and hear the music running back and forth, as I imagine such nostalgic feelings and others. In any case, the beginning of the game is based on the study and protection, understanding how one can be improved by upgrading and buying of objects and items, and tasks and chores to earn figures, possibility to get stronger and essentially, progress on the game since, and here comes my reference version of the PC, it took me quite a lot time to get used to the keys, and who felt that control them, it was not perfect and sometimes I found myself taking several places, because the sequence of clicks on a computer is not convenient, and certainly have if I would console to another as the Xbox, I was not experiencing those problems. I loved the thing that areas other than the city can reach them without tasks / chores of any kind. Classic examples are the vessel of approximately Freiza, Home Buu, etc. Wide range of characters in a very, but a bit disappointing not all of them used any plot. For example, there is a part of the story with Goku fights against Freiza and get the Power Up is known, in the form of the Super Sayain. Normal history, the battle was fought and finally Goku wins and leaves the planet. But the plot of the game, someone changes the history and causes, in addition to Freiza even cooler and creates interference appears in time, because it is not what it should be. As members of a cell of the time, we are in place and balance the factors that battle and that history will not change. So yes, here we have seen the use of beautiful images that

are not necessarily relevant for that period, but I was very pleased if we would see more of these things. I have personally been sorely missing from the combination of Goku and Vegeta have become Vegitto indeed appear as a character in the game, but not in the plot. Even the plot and the use of images from Dragon Ball GT would be added, that if there are any characters and even used some of them (Jambeta) So why not more? And this leads me to another point washing disappointing, the plot simply wanted too quickly from one event to two and actually created a situation in terms of storyline match very early in my opinion.

from here we go to points and other references. The game to me was a lot of fun and one that is not as much time on the computer, then yes, it took me a while. Once entering this game, it is very difficult to break away from it. And there is also a multi Flair mode, which is a huge advantage and adds a lot (you can even see the other players flying in and around the city where we play!) But it is less elaborate, because I did not get to play it yet. In terms of matching the existing plot anime (now Super Dragon Ball), the game comes a point quite close to us and plot storm in Golden Freeza and his battle against Goku and Vegeta Super Sayain God mode. This battle is before last (the rest you will discover ..) plot and already indicates the end of the game. In the future, I believe that any DLC release include the true story of these moments refers to Goku Black and Zamatsu. In conclusion, I have tried to show the way in which I do not mind revealing too much about the game and Freeing "You spoilers and interesting you from Sni.ani encourage all those interested to download and discover for themselves on this game, not too many requirements in the sky and I will post them here. In addition, the publication will put a link here guy sent here to download the game you can also play with them. Hope you enjoyed my review, it was just a general overview and point of view of a player in the PC, so again repeat it, not everyone sees it that way.

I have included references to that review but there are:

- The game can run at 60fps, for me this experience to those who can run
- You can move around the city in flight or on the skimmer.
- Bardock, Goku's father takes a significant part of the plot of the game.
- There are sub-tasks in terms of plot not prevent you advance the main plot.
- A huge variety of attacks that can learn and acquire.
- You can get Goku and Vegeta the Super Sayain as God
- IGN score is 7.5 out of 10.
