Thread: [Free FUD office Word/Excel macro!](#)

redhook - November 14, 2016, 5:42 pm

Hello!

I don't see anyone share this tool on hf then I will share this with you guys. This is method how to get FUD macro easly.

1. Go to github.com/khr0x40sh/MacroShop and download all files.
2. Unzip your archive and open cmd.
3. Go to files directory via cmd and write "python exeinvba.py --exe test.exe --out test.vb" (test.exe is your file executed when macro starts).
4. Open new generated test.vb via notepad and copy all this code.
5. You can use this macro in Word/Excel/Powerpoint and more. Open for example Word go to "View" and "Macros". Set random name to your macro and select "Macros in:" "Document1". Click create and find tab "ThisDocument" (in Excel "ThisWorkbook"). Paste all code from test.vb.
6. If you use this code in Excel you don't have to change code but in Word you must change "Private Sub Workbook_Open()" to "Private Sub Document_Open()".
7. Save as .doc or .docm.
8. You got your FUD macro?

Freshnuts - November 15, 2016, 11:49 am

Thanks you for the share man, I checked it out and looking at some of them now.

Let me know if this works for you please ?

Frankey - November 15, 2016, 1:21 pm

This probably works, not gonna test it out since i do not need any MS macros. But i think this is only scan time FUD and not Runtime.

PSEUCHO - November 15, 2016, 1:23 pm

Thanks so much! Helps me a lot!

redhook - November 15, 2016, 2:42 pm

Thanks guys for feedback!

amosmarcus87 - November 15, 2016, 2:53 pm

i need to install python on my system before this can work ?

redhook - November 15, 2016, 2:54 pm

(Nov 15, 2016 03:53 PM)amosmarcus87 Wrote: [\[CITE\]](#) i need to install python on my system before this can work ?

Yes. I testing it on python 2.7.

amosmarcus87 - November 15, 2016, 3:02 pm

(Nov 15, 2016 03:54 PM)redhook Wrote: [\[CITE\]](#) Yes. I testing it on python 2.7.

how do i make it fud after detection rate increase ? or does it give new fresh fud codes each time we run the steps given ?

redhook - November 15, 2016, 3:08 pm

(Nov 15, 2016 04:02 PM)amosmarcus87 Wrote: [\[CITE\]](#) how do i make it fud after detection rate increase ? or does it give new fresh fud codes each time we run the steps given ?

I think it will be FUD when you create new .doc or .docm but if not you can only obfuscate your exe or crypt it.

amosmarcus87 - November 16, 2016, 6:10 am

i tried this today on my laptop cmd and its saying (python is not recongnized as an internal or external operable program or batch .. any body with help for me ? or do i have to run the commands on python command line ?

mandapex - November 16, 2016, 6:44 am

Thanks for this cool stuff.

Creepers - November 16, 2016, 6:45 am

Yess, thiss is good, thx. amazing

DopplerAF - November 16, 2016, 6:45 am

This is a easy way to get macro but it is of course not FUD.

redhook - November 16, 2016, 6:47 am

Try to write only "exeinvba.py --exe test.exe --out test.vb".

(Nov 16, 2016 07:45 AM)shazsyed Wrote: [\[CITE\]](#) This is a easy way to get macro but it is of course not FUD.

Every time when I do it with FUD exe I got FUD macro.

thanks ,.. that worked fine .. another question is .. what do i replace my server link with ? is it the test.exe or the whole line (outfile = "c:/??????/test.exe")

waiting for answers .

You must put your exe in exeinvba.py folder. Then you doesn't must write all directory to your exe.

amosmarcus87 - November 16, 2016, 7:22 am

(Nov 16, 2016 08:09 AM)redhook Wrote: [\[CITE\]](#) You must put your exe in exeinvba.py folder. Then you doesn't must write all directory to your exe.

what about if you want to send it to somebody through email to open the macros (.doc) and execute the enable content .. will the doc run your exe file on there system ?

redhook - November 16, 2016, 7:32 am

(Nov 16, 2016 08:22 AM)amosmarcus87 Wrote: [\[CITE\]](#) what about if you want to send it to somebody through email to open the macros (.doc) and execute the enable content .. will the doc run your exe file on there system ?

Yes. When you use exeinvba.py this will change exe to vba then vba is your exe.

amosmarcus87 - November 16, 2016, 7:38 am

(Nov 16, 2016 08:32 AM)redhook Wrote: [\[CITE\]](#) Yes. When you use exeinvba.py this will change exe to vba then vba is your exe.

does this mean .. for example .. my server is .. keylogger.exe .. i will rename it to test.exe and replace my new test.exe with the test.exe that is in the macroshop-master folder ? .. pls can you add me on skype .. same neam here .. amosmarcus87 .. thanks

PVPMinersDE - November 16, 2016, 8:39 am

thank you for your share keep it up ;)

Rb.sider - November 16, 2016, 11:13 am

Pls what if i want to add a social engineering feature i.e somerhing to convince the receiver to enable macro. How can i go about this??

redhook - November 16, 2016, 11:40 am

(Nov 16, 2016 12:13 PM)Rb.sider Wrote: [\[CITE\]](#) Pls what if i want to add a social engineering feature i.e somerhing to convince the receiver to enable macro. How can i go about this??

You can edit your document as you want. You can add "You must enable macros to see content". You can do anything what you want. You can search this on google.

JavaDriveBy - November 16, 2016, 11:45 am

Posting to comback later ?

amosmarcus87 - November 16, 2016, 11:52 am

do i have to replace my .exe file with the test.exe file in the macroshop-master folder ?

redhook - November 16, 2016, 11:56 am

(Nov 16, 2016 12:52 PM)amosmarcus87 Wrote: [\[CITE\]](#) do i have to replace my .exe file with the test.exe file in the macroshop-master folder ?

Yes or you can copy your .exe to this folder with different name. Then you must write "exeinvba.py --exe (your new file).exe --out test.vb".

Rb.sider - November 16, 2016, 4:11 pm

When i open doc an enable macro it shows runtime error 3004. And doesnt execute file.

Yes you must enable content to execute file

SIM-2478232 - November 27, 2016, 11:51 pm

After I enable macros to see content the AV McAfee detected it?

redhook - November 28, 2016, 5:05 am

(Nov 28, 2016 12:51 AM)maximisxxx Wrote: [\[CITE\]](#) After I enable macros to see content the AV McAfee detected it?Do you use fud exe for this macro? Try with putty.

purest21 - December 11, 2016, 7:40 am

thanks for the share. but i dont even know where to get python and does it work on windows

gork - January 22, 2017, 10:51 pm

I tried but I dont know why this didnt work for me.. I could really use a helping hand

varcula - February 1, 2017, 1:21 pm

I love you man you're the best. You helped me figure out how to use macros. <333

NiKaLo - February 2, 2017, 10:54 am

its still fud ? !!!!! I need

redhook - February 4, 2017, 5:48 am

(Feb 2, 2017 11:54 AM)NiKaLo Wrote: [\[CITE\]](#) its still fud ? !!!!! I need

Detection is depends from your file. If your file is FUD then macro will be FUD.
