Just threw a lip in for the first time in a while, man I'm feeling it.

My first dip went all kinds of fucked up, I think I threw in to fat of a pinch and I ended getting lightheaded af to the point that I almost fell a couple times. I ended up having to sit then a few minutes after, I felt the need to go shit so I went and a couple minutes into my diarrhea session I ended up throwing up while still on the shitter. It was bad lol but after laying down for a while everything straightened up.

I'm sure I swallowed some tho
