Thread: [Password gatherer on IE/Mozilla](#)

Aleksas - November 15, 2016, 10:16 am

Hey, I been working on my code a lot again lately, I got Google chrome passwords easily , but I do struggle with Mozilla and IE since I don't use them, by the way I heard it has hashes not plaintext, it's not a problem, I just need to extract the hashes.

Thanks for your help.

Many thanks mate, I got all the information I need for Mozilla, but the IE one is not on python, I believe it's one of the C languages, but still thank you, mozilla is the most important one. :)
