Illuminati triangle - Testimonial;

I found out about Hack forums back in the day by being a skid and google how to hack accounts and sure enough I found my way here. That was back in 2008, when the forum was still relatively new. I created an account, and only made a few posts. My account was closed due to inactivity, the reasoning for being inactive was my grandfather had died so I was pretty fucking torn up by it.. Anyway lets hop into this (when I made my return to Hack Forums).

This isn't going to be one of those testimonials about how i made a shit ton off the site. I've made some money but nothing notable. This is more about the friends I've made on here and stuff like that.

So my time on Hack Forums has been fantastic for the most part, there's been some times on here where I didn't like it, that was due to some members that were not the nicest. But over the years I have met some fantastic friends. One of my first friends here on hf was the user "time" he's closed and has been for some time. But he was one of the first people to help give some pointers on how to secure my accounts and stuff like that. Haven't talked to him in many years. There was a point in time when I was extremely depressed and a few of the members that I had became friends with helped me. I was extremely close to killing myself a few times where I had a bottle of pills & a noose tied, and they talked me out of it. Honestly if it wasn't for them I probably would've went through with it and I still wouldn't be here. Those members they know who they are, some are closed but some are still around. I am always going to be grateful to those members, and if it wasn't for hack forums I wouldn't have met those members. So that's one way that Hack forums has made a huge impact in my life. I've also done the same thing for a few other members, one of them is still around, I won't mention his name, but if he reads this, I will always be here fam. Some of the friendships I have made on here are friendships I will always cherish. One of those friendships would be the one I have with Cryptic [™], he took a massive chance on me, he let me run his forum when he had it, he hosted shit for me, he helped expand my knowledge on VPNs, hosting and other stuff. Like he's a great guy. He still helps me with stuff if i have problems and I can't fix them. Another friendship would be with the user Realizm, like that fool is always there when I need someone to rant to. Like the man would give me the dirty shirt off his back if I absolutely needed it, its not often you find friends like him. Red Sox is another user I met here who is a great friend even though he's an idiot, that kid has always been there since the first day I met him. ViewsFromThe6ix is another friend I have made here on Hack Forums, that kid is there for me no matter what the issue is or no matter what time it is. That kid is a1. I know there is a bunch of friends I haven't included but you all know who you are, and I'm grateful to have met you all. Love y'all.

Honestly a lot of friends I have made here on Hack Forums are friends I hope to have around till I die. A lot of them have been better friends than the ones I have outside of Hack Forums.

Shoutout to Omniscient for running the forum for so long & keeping it up. Much appreciated.
