Thread: [Sales Job - Sales thread | Customer service](#)

Skiezo™ - November 16, 2016, 2:02 am

Hello all,

I'm looking to advertise or sell a product on here on other websites for you. I've got a lot of experience in software that are used in the Hacking Scene. I'm a hard worker, fast responder and as far as I think my grammar is more than fine. I follow a study for Computer Technician, that means I'm really active during the week and weekends. I'm almost always on my laptop and smartphone to check for messages and to see if I can offer assistance to those that need.

Besides from all of this, I have had owned my own products here on the forum and I have never caused any problems.

I've been in the Marketing and Hacking Scene for 6 Years.

Experience with:

Remote Administration Tools

Keyloggers

Crypters

Virtual Private Networks

Hosting Websites

Languages:Dutch, Flemish (The Netherlands, Belgium)

English

Assistance and skill that I contributed myself:[RoyalVPN - Product that I used to own](#)

[RAT Helpcenter](#)

[Feuer Crypter - Product that I used to own](#)

If you would like to have more information about me, please do not hesitate to private message me or check my profile.
