Thread: [Is there a serious sound difference between the HyperX Cloud /Cloud II](#)

Red_World - November 16, 2016, 6:03 am

I know that the mic got a serious upgrade but I don't mind that I just need a working mic, but the sound is very important to me...

So is there any serious sound difference? because there is 30\$ price difference...

Thanks.

As a guy that was the hyperx cloud and tried the II, there is no sound difference imo..

Thanks for the reply..

I would really like to hear some more thoughts about it from other users..

Thanks.

I think that Cloud II is better mate, I've used both and Cloud II feeling better on your head and have nicer sound, not that much.

the mic is still garbage compared to a \$40 blue snowball

It's the 7.1 surround. Most people don't like it but i personally do.
