Thread: [censored words/names on HF](#)

Silver Fang - November 16, 2016, 10:48 pm

Hello, is there any list of which words/names are censored on HF?

I found out that a name/word/brand was censored and wish to know if this is something that have been added by mistake to the censored word/name list... if not i wish to know the reasoning behind it.

Thanks in advance

Well I know that fag-got without the dash gets autofiltered to friend. I haven't seen a compilation of every filtered term, though.

Maybe there should be one added.

I wish to know why the word/name (CSGO related) is banned/censored.

Would we be allowed to ask admins for these types of questions?

Not sure how to go about this suggestion. Would a list increase the usage of such terms? Or would it decrease usage when users use the words they see listed and find out they're filtered? ?

There is no such list that is public.

Well my question is why the word/name is banned.

I know there have been sites that got censored on HF, etc 'competitive forums'. But i have no idea why a csgo cheat name would be banned. Anyone know more about this? The name starts with League and ends with cheats.

There is a person on this forum that uses the name "leaguemode" for his cheat and the cheat im refering to starts with league but ends with cheats... If anyone have more info regarding this banned

name please let me know.
