Thread: [\[FREE HQ GFX\]GFX Designs for free\[FREE HQ GFX\]](#)

BlueBeastDK - November 18, 2016, 6:51 pm

My last post, got my thread and inbox bombed so much that I drowned in orders and requests. I managed to get around 70 requests, in just 2 days, which were way too much for me to keep up with. So my motivation died, and I went inactive for a long time. This time I'm coming back strong, with more spare time to fulfill your wishes

I'm willing to make free Thread designs both Static and Dynamic (Plain thread design and animated), Logos, Avatars and Signatures. What ever you need done, try and contact me. I'm willing to go to places where I'm not very experienced, this is the whole purpose for this post - to gain experience.

I work most efficiently with strict guide lines to what you need, where you tell me what you imagine to get created, I might not be able to make what you're looking for with my capabilities but I will most definitely give new and hard challenges a try

[My portfolio](#)

Simply PM me the details and I'll respond, the wait time may change depending on the "order" and simplicity.

If this isn't the right offer for you, then have a good day and happy scrolling ?
