Thread: [HF polls showing incorrect poll results?](#)

Wakka - November 19, 2016, 10:15 am

So I made a thread earlier on which web browser members preferred... Now if you add up all the users who voted for google chrome it doesn't tally up with the result on the right... The result should say 17 not 15.

Dunno whether this is a known bug or not, couldn't find anything when searching.

minimalist - November 19, 2016, 10:17 am

"This is an issue caused by MyBB not having a normalized database structure. They most likely do it to make it faster to get the numbers. That also means that the cached numbers and the actual votes don't add up on larger boards.

Mentors use this userscript to count the actual votes on the MotM poll, which will look at the usernames and change the numbers."

source: <https://hackforums.net/showthread.php?tid=4936464&pid=47329450#pid47329450>

Attached userscript:

Code // ==UserScript==

// @name Hack Forums - Poll Counter

// @namespace Xerotic

// @description Counts polls properly when they are public (or mod of the section)

// @require http://ajax.googleapis.com/ajax/libs/jquery/1.11.1/jquery.min.js

// @include *hackforums.net/polls.php*

// @grant none

// @version 1.0

// ==/UserScript==

var total_count = 0;

```
$('.quick_keys').first().find('tr').each(function() {
  if(!$(this).children().first().hasClass('thread')) {
    if($(this).children().first().hasClass('tfoot')) {
      $(this).children().first().next().html('<strong>' + total_count + ' votes</strong>');
    } else {
      $(this).children().first().next().next().html($(this).children().first().next().find('a').length);
      total_count += parseInt($(this).children().first().next().find('a').length);
    }
  }
});
```
