i5-4460 is a very good processor, I am using it right now. Handles multi tasking perfectly and gaming. Good budget CPU. GLWS

I might consider bidding, only missing CPU and PSU for new computer.

Well then

It is sitting in your PC? as in you are going to take off the thermal glue when you take it out?

Yes mate I will clean off all the thermal paste. As soon as it sells I will take it out.

Let me fix this shipping issue. I have no idea why it says that for a small package

Guys shipping is not gonna cost 65 fucking dollars for a tiny cpu. If its that big of a deal I will pay for it.
