Thread: [stealing files from someone by just knowing their ip](#)

fsec666 - November 19, 2016, 5:27 pm

how can i steal files from someones pc by just knowing their ip address

AxiS JR - November 19, 2016, 5:28 pm

If this was possible, you could put the billionaire tag on my forehead.

thespitefulchant - November 19, 2016, 5:32 pm

only in a perfect world

:)

Prophett - November 19, 2016, 5:33 pm

This is not possible. The most you can do is DDoS the IP.

Seductable - November 19, 2016, 7:03 pm

Oh boy, I'd love to know how to do this.

?Criminal - November 19, 2016, 7:41 pm

if they have FTP open or convincing them to open FTP on their home connection it should be, aside from that though this isn't normally possible.

CichyCichoCiemny - November 20, 2016, 3:11 am

Maybe.. Just maybe they have telnet open. If they do, just use cmd to connect.

?

thegreekguyy - November 20, 2016, 5:10 am

It's possible with 0day exploit but no one is gonna share something like this for free

Last_viking - November 20, 2016, 10:40 am

<https://hackforums.net/showthread.php?tid=816873>

I am not sure

That this will help you

?

chiikriamsih - November 20, 2016, 11:25 am

lol man only if this worked lmao

Phobya - November 20, 2016, 11:52 am

As others have mentioned, you can't really do anything with just an IP. If you have an email or some other way of sending them information, you can access their computer with a RAT and steal all sorts of files, but with an IP you're limited to DDoSing as far as I'm aware.

Zer0Memo0ry - November 20, 2016, 11:59 am

Believe me my man, there isn't a 0day exploit for this.
Simply not doable.

SchwererGustav - November 20, 2016, 2:11 pm

well either 0day exploit which u can somehow find it on exploit-db website ,or the Ip computer have got telnet or ftp port enabled

Lord_Jesus - November 20, 2016, 2:13 pm

You can use "agensoayp" this tool will gather all open port, and launch a ratterino attack and make a atomic rocket launch which will cause malfunction of the system that will open the "url" bug that will then lead to be able to easily compromise the device. Cheers.

Zexo - November 20, 2016, 2:17 pm

The amount of skid on this thread is giving me cancer.

Hey man
Why are so rude
Now you are giving me cancer?

NERO - November 21, 2016, 8:45 pm

Use their ip on a geo-location thing, Walk around their neighborhood shouting their name, When the person comes out their house like WTF punch them in their face, Walk in the house, Grab their computer and then you have all the files you need, 10/10 Method - Tried & tested.

Some reviews of this method:

IGN - Good Method 10/10

PCWORLD - Could be better 7/10

HackForums - Best method ever 11/10

Dogecoin - Much Skill Much Points 10/10

Hope this helps :)
