Thread: [Python Twitter updater](#)

xx1ben99xx - November 20, 2016, 7:09 am

Hi, I want to be able to get somebodies tweets as soon as they tweet, but so far all I can do is make it so that when i manually ask for the tweets rather than it automatically updating for me.

Heres my code:

PHP Code

```
<?php
import twitter
api = twitter.Api(consumer_key="", #im not showing you my tokens and keys
                  consumer_secret="",
                  access_token_key="",
                  access_token_secret=")
```

```
statuses = api.GetUserTimeline(screen_name="USERNAME") #username of twitter profile
stats = ([s.text for s in statuses])
print(stats[0])
```

So how do I get it to automatically update rather than rerunning the script?

Perhaps use some kind of a listener to listen for new tweets and instantly notify you when they are out?

Yeah I thought that but had no idea how to do it?

ok I have this so far

PHP Code

```
<?php
@bot.command()
async def alerts():
    consumer_key = "
    consumer_secret = "
    access_token = "
    access_token_secret = "

    class StdOutListener(tweepy.StreamListener):
        async def on_data(self, data):
            decoded = json.loads(data)
            print('@%s: %s' % (decoded['user']['screen_name'], decoded['text'].encode('ascii', 'ignore')))
            msg = ('@%s: %s' % (decoded['user']['screen_name'], decoded['text'].encode('ascii', 'ignore'
            )))
            await bot.say(msg)
```

```
return True
```

```
def on_error(self, status):  
    print (status)
```

```
if __name__ == '__main__':  
    l = StdOutListener()  
    auth = tweepy.OAuthHandler(consumer_key, consumer_secret)  
    auth.set_access_token(access_token, access_token_secret)  
  
    print ("Showing all new tweets for #nmd:")  
    stream = tweepy.Stream(auth, l)  
    stream.filter(track=['tweets'])
```

So im using this as a discord bot but I dont know how to make it write the new tweets in the chat, btw there is more to the program but i didnt include it. I can make it write the idle but not in the dicord - fyi the bot is fully working
