Thread: [What happened to hackforums.net?](#)

F?cqlе?? - November 20, 2016, 8:31 am

I remember Omni adding a nsfw subdomain but I can't seem to access it.

<https://www.hackforums.net>

Is there a new way to access it or is it no longer available?

Riyu - November 20, 2016, 8:32 am

I read somewhere that he couldn't transfer it over something

You can still edit your user CP to not see images:

The nsfw subdomain was intended to remove images from HF so his suggestion is relevant, however it doesn't remove the logo.

The nsfw site removes images and signatures I thought

Omniscient - November 20, 2016, 11:06 am

It was removed due to some of my server changes I made. I don't think it's coming back.
