Thread: [\[FREE\] Netflix Landing Page](#)

**Koodex** - November 20, 2016, 10:25 am

Thought I should share since the landing page converts really well.

How does it work?

-> Each time a unique email and password is generated.

-> The email has some letters replaced with \* to make it hidden.

-> The person is asked to press on the 'Verify' button to proceed to the human verification step.

The point is that they complete the survey you can also edit it a bit and and let it generate actual working netflix accounts for some returning visitors.

would this be a good starter niche with facebook ads?Yea but it's considered BH so you'll need a cloaker and your ads account probably gets banned after a while.

I wouldn't try to send traffic directly to it from facebook ads. Create a landing page with an opt in and you can collect e-mails to promote to later. Looks legit from facebook's point of view.

Yeah you would need a domain and hosting. You might be able to find someone that would be kind enough to host it for you though if you don't wanna get a domain and hosting.
